## Summary

I've always had a natural curiosity and interest in developing, coding, and emerging tech. learning and mastering blockchain development weren't easy at first, but I tell you... It is fun. In my period of learning, I've gained a lot of value and knowledge and I still keep learning. I have 3 years of experience as a web developer and switching to blockchain was really intriguing.

I'm passionate about creating smart contract projects and anything relating to blockchain and cryptocurrency; offering tangible results in line with client expectations.

My name is Ajaye Favour. I am a blockchain developer, consultant, Auditor & Researcher.

What can I offer?

1. I will make a blockchain-based app for you by writing Smart Contracts with Solidity programming language.
2. Ensure code quality and software reliability through automated testing, Auditing implementations, and processes.
3. Participate in automated deployment and operations of multiple blockchain networks.
4. Assist with the integration of existing tools and services
5. Create high-quality software documentation and other written assets to document and explain the system design and how the system functions.
6. I will deploy it on the Rinkeby Test server or any test network or Main Ethereum Network.
7. I will make your Existing web to interact with Smart Contract.

And lots more!

Do you feel you want to talk about blockchain development? Of course, I am open to talk about it. I would really love it.

What are my skills?

### MY SKILLS

- Ethereum Smart Contract development
- Unit testing for Smart Contracts with Javascript libraries like Mocha & Chai.
- ERC20 | ERC223 | ERC721 Tokens and Smart Contract for Initial Coin Offerings(ICO).
- Decentralized Applications (DApps)
- Solidity
- OpenZeppelin
- EthereumJS
- Web3JS
- EVM (Ethereum Virtual Machine)
- Trufflesuite
- Metamask
- JavaScript
- NodeJS

And guess what? I'm still learning so I would be able to help more!

I also love to connect with people because I feel I will get value from them.  
Send me a message if you love to reach out or connect too...

## Experience

### **Blockchain Developer**

May 2021 - Present (5 months +)

### **Web Developer**

Freelance

Feb 2018 - Present (3 years 8 months +)

Develop websites

## Education

### **Federal University of Technology Minna**

Bachelor of Technology - BTech, Chemical Engineering

2016 - 2022

## Skills

Solidity • Initial Coin Offerings (ICO) • Auditing • Integration • Unit Testing • Research • Smart Contracts • Blockchain • Node.js • Ethereum
